Basic Safety Warnings

1. **Indoor Use:** Personal injury and/or product damage may occur if the product is used for purposes other than its intended use and/or altered/modified from its original design. The product must be assembled and used in accordance with the instructions provided.
2. **Moving Large Furniture:** Exercise caution when moving large furniture, and it is recommended that two or more people collaborate to avoid personal injury or floor damage.
3. **Child Safety:**
 - Children are prohibited from climbing or standing on furniture to prevent personal injury from accidental tipping.
 - Children must not assemble the product. During assembly, keep small parts out of their reach to prevent fatal risks from swallowing or inhaling.
 - Keep packaging materials (such as plastic films, plastic bags, foam, etc.) out of children's reach to avoid potential dangers, such as suffocation.

Tips for Installation and Usage

1. **Proper Assembly:** When assembling, first loosely align all screws with the corresponding pre-drilled holes, then tighten each screw one by one.
2. **Avoid Repeated Disassembly:** Do not disassemble or reassemble the product frequently to prevent damage to the parts.
3. **Anti-Tip Device:** If the product is equipped with an anti-tip device, ensure it is installed to prevent accidental tipping that may cause injury.
4. **Regular Inspection:** If you find any abnormalities (such as loose screws, wobbly frame, etc.) during use, stop using the product immediately and tighten the screws again to ensure the structural integrity.
5. **Load-Bearing Capacity:** To prevent the tabletop from deforming under pressure, distribute the weight of items evenly and avoid concentrating the weight in one place for extended periods.

Usage Environment

1. **Avoid Humid Environments:** Although metal and engineered wood are durable, prolonged exposure to high humidity can cause the metal parts to rust and the wood to deform. It is advisable to place the furniture in well-ventilated and relatively dry areas.
2. **Avoid Direct Sunlight:** Prolonged exposure to sunlight can cause wood to fade and accelerate aging. Try to place furniture away from direct sunlight or install curtains to mitigate the effects of UV rays.
3. **Keep Away from Heat Sources:** Do not place hot objects close to or directly on furniture for extended periods to prevent discoloration of the finish or irreversible damage to the product.
4. **Electrical Safety:** For products with electronic components, keep them away from water sources and humid environments to prevent electrical leakage and short circuits for user safety.

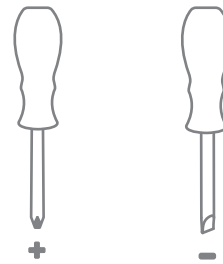

Eco-Friendly Recycling Suggestions

1. **Furniture Recycling:** When your metal and wooden furniture reaches the end of its lifespan and is no longer suitable for continued use, consider environmental factors and choose an appropriate disposal method.
2. **Battery Recycling:** For products containing batteries, do not discard used batteries casually to avoid environmental and water source pollution.

ATTENTION

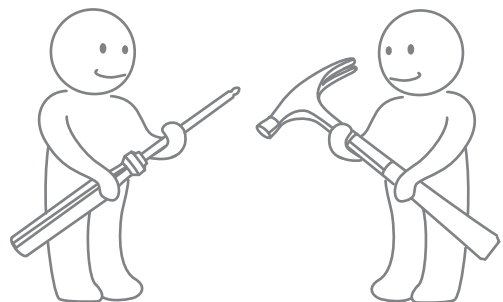

Required Tools

Having these tools ready will make your assembly much easier and efficient.

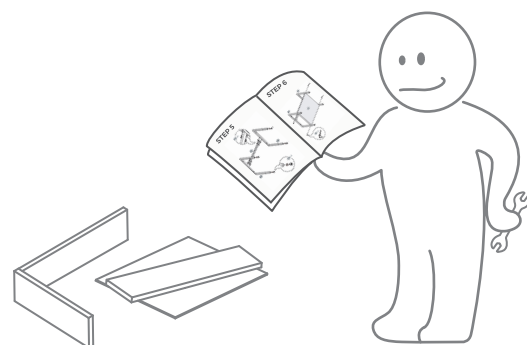

Teamwork

Two or more persons are needed for assembly.

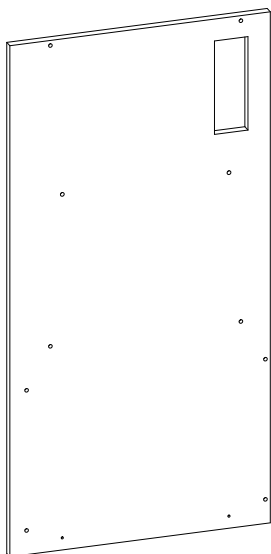

Read

Read the instructions before operating and keep it properly.

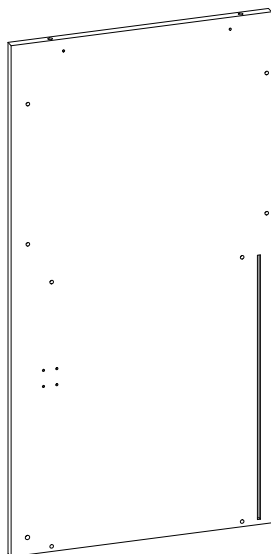

- Use a hair dryer and set the fan setting to "Low" to soften adhesive and remove the paper sticker.
- If there is glue stain, use alcohol to wipe it clean.
- Please check if the parts are intact before starting the assembly.
- Please feel free to contact us by email if you have any questions or concern. We will reply within 24 hours.
